Environmental Policy

Our Principles for Environmental and Resource Protection

Alongside our economic performance and the high quality of our products, responsible stewardship of the environment and natural resources is a core element of our corporate management.

As a trading company in the plastic packaging sector, we have limited direct influence on manufacturing processes. We therefore fulfill our responsibility primarily through the careful selection of our business partners, our product portfolio, and close cooperation with our customers and suppliers.

We are committed to complying with all environmental and regulatory requirements applicable to our company and to continuously improving our environmental performance within the scope of our operational capabilities.

USIMEX GMBH
Roßfelder Straße 64

In doing so, we are guided by the following principles:

1 Supply Chain Responsibility

We give preference to suppliers who comply with recognized environmental standards and expect all business partners to handle environmental matters responsibly.

2 Promotion of Sustainable Packaging Solutions

We actively support our customers in selecting material-efficient, recyclable, and — where feasible — resource - conserving packaging solutions.

3 Conscious Product Selection

Within our scope of influence, we systematically incorporate environmental aspects into the selection and ongoing development of our product portfolio.

4 Resource-Efficient Operations

In our internal operations, we ensure the responsible and efficient use of energy, water, materials, and other resources. We strive to prevent waste and avoidable environmental impacts.

5 Employee Awareness and Engagement

We foster environmental awareness among our employees and actively engage them in sustainability and improvement initiatives.

6 Open Dialogue and Transparency

We maintain an open, transparent dialogue with customers, suppliers, authorities, and relevant stakeholders regarding environmental matters.

Executive Management reviews this Environmental Policy on a regular basis and updates it as needed.
